Summary

Kaeside is a web and mobile app developer from New Jersey. He currently works as a front end web developer for Baldwin and Obenauf where he develops websites using vanilla JS, jQuery, and Nunjucks.

He has a background in distributed antenna systems, civil engineering, and information technology.

He's an avid cyclist, loves the martial arts, and loves martial arts movies. He can often be found attending live music events in New Jersey or cycling around Bergen, Orange, and Rockland County. He also has the script of Forrest Gump memorized and has watched every Jackie Chan film to date.

Work experience

Front End Web Developer
November 2016 - March 2017

Baldwin and Obenauf

Web developer creating modules and maintaining consumer facing websites in an agile development environment using vanilla JS, jQuery, SASS, Gulp, and Grunt. Responsible for the maintenance and deployment of sites to different staging and production environments via Interwoven's TeamSite ContentCenter CMS. Align with creative team, project managers, and account team to collaborate on deliverables.

Please visit the following sites for samples of sites and modules that I have created and maintained:

- https://masterpass.com/#he-il https://masterpass.com/#zh-hk Manny Designs

Software Engineer
September 2016 - September 2016

Manny Designs

Engineer that developed and assists lead engineer in development of web and mobile apps using React JS and React Native.

Senior Engineer
November 2013 - April 2016

Maser Consulting

Designed distributed antenna systems, from a civil engineering perspective, of cellular sites and network expansion for major telecommunications providers such as Verizon, AT&T, T-Mobile, and Sprint in NYC, NJ, New England, and Maryland.

Outreach Desktop Support Analyst
July 2012 - November 2013

Englewood Hospital and Medical Center

Lead Analyst, Project Lead, and Technical Support Representative for the Medical Associates of Englewood Hospital and Medical Center (EHMC), responsible for overseeing the integration of private practices into EHMC's infrastructure, supporting the legacy systems of private practices, and support for any infrastructure related issues

Education

Bachelor's of Science in Civil Engineering

September 2005 - May 2013

New Jersey Institute of Technology

President of the NJIT ASCE Chapter

President of NJIT Chapter of Pi Kappa Phi Fraternity

Full Stack Web Development (Mongo, Express, React, Node)
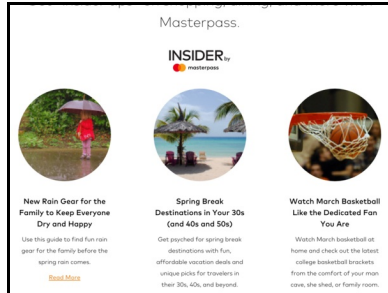

April 2016 - August 2016

Thinkful

Intensive, four month program in modern full stack JavaScript web development. Covered topics including responsive mobile-first web development, UI development with React and vanilla JavaScript, testing with Mocha and Chai and full stack JavaScript development with Node.js. Collaborated daily with fellow students and with a senior web developer through pair programming and Git / GitHub.
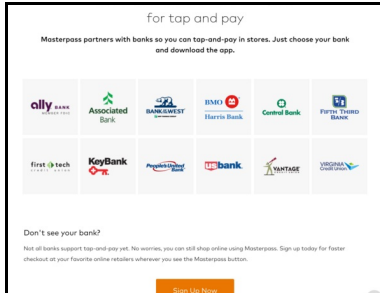

Portfolio

Please visit my GitHub to see live demos of the projects below:

- EatUp: Full Stack React JS app that joins people that want to eat the same type of food at a top rated restaurant in their city.
- CozyFi: Full Stack React JS app that lists user generated co-working spaces along with their features within your area.
- GigIt: React JS and Socket IO chat app that allows users from across the globe to chat with one another.
- ISS Tracker: React Native iOS app that tracks the location of the International Space Station.
